

**MagBlock Inc. MagBlock 556 Range Safe (RS) Is National Tactical Officers Association (NTOA) Member Tested and Recommended**

*August 30, 2016*

***The Patented, Weapon Safety and Sealing device, MagBlock 556 RS (Range Safe) Achieves a High Score of 4.68 out of a possible 5.0***

**Enterprise, Al. – MagBlock Inc.** is an Enterprise, Alabama based company that manufactures Patented MagBlock® Weapon Safety and Performance Devices. MagBlock RS is the only weapons' safety device that can be easily seen from both sides of a firearm. The MagBlock 556 RS is the only patented firearm safety device available that provides storage, sealing from the environment and extreme durability. The MagBlock 556 (RS) utilizes a patented Double-Locking floor plate that allows normal operation when an M203 launcher is installed.

MagBlock 556 RS has earned high score 4.68 out of 5.0 through the NTOA's Member Tested and Recommended program.

A tester from Pennsylvania commented, "The MagBlock RS drew the attention of the rifle instructors they said the department needs them right away. Every rifle operator was able to clearly see that the weapon was unloaded due to the bright color. The MagBlock RS fit exactly like a normal magazine and can be released by the mag release"

A tester from Wisconsin commented, "If it were up to me, it would be mandatory that every weapon in our armory has a MagBlock. This is a great and simple-to-use product!"
